Ek: omniscient.zip
Konu: New OMNISCENT.COM (2016) with 4KB size

Hi Dirk,

I have corrected tab stop (text position) defects in (windows xp) notepad
then I have saved new OMNISCENT.ASM and SNC_OMNI.ASM files
(I have not changed any part of the source code except tabstop-space corrections)

...

By using TASM and TLINK in dosbox (after mounting c:\dosprogs folder as C:)
i have compiled OMNISCENT.ASM as OMNISCENT.COM (5KB) -4781 bytes-
then i have used apack.exe (v1.0) for compressing
now, new OMNISCENT.COM (as product of APACK.EXE) has 4081 bytes file size

All (required) files in the attached zip file. (asm, com, packed com, apack, tasm, tlink)
you can run your program's last image in DOSBOX if you want to see the status
after many years (1997 -> 2016).

Regards...
Erdogan Tan
